Education

Dr. B R Ambedkar National Institute of Technology Jalandhar, India
B.Tech – Electrical Engineering — ***CGPA: 9.19*** *2020 – 2024*

Skills

Technical Skills

C++, Java, Python, MySQL, JavaScript, React, API

Cloud & Tools

AWS, Docker, Kubernetes, Linux, Microsoft Excel, User Experience, Agentic AI, Generative AI

Core Concepts

Data Structures & Algorithms, OOPS, DBMS, Operating Systems, LLM, SDLC, Agile, Scrum, ITSM

Work Experience

IBM Pvt. Ltd. – Associate Consultant July 2024 – Present

- Manage and enhance 3 client applications hosted on **AWS**, ensuring high availability, scalability, and performance optimization.
- Work with **Docker** containers and cloud infrastructure to support deployments, CI/CD workflows, and application stability.
- Troubleshoot and resolve **Level 1 & Level 2** application issues, minimizing downtime and improving system reliability.
- Implement application **enhancements** and **bug fixes** aligned with business and technical requirements.
- Monitor application **performance**, identify bottlenecks, and proactively optimize system efficiency and user experience.
- Collaborate with **cross-functional teams and stakeholders** to deliver technical solutions and ensure timely issue resolution.
- Effectively **communicate status, issues, and risks** to stakeholders in a precise and timely manner to ensure smooth delivery.

Skylark Drones Pvt. Ltd. – UX/UI Intern Jan 2024 – May 2024

- Contributed to enhancing **15–20 core features** of Drone Mission Ops (DMO), a SaaS platform for commercial drone operations, to streamline operational workflows.
- Redesigned core website and mobile application features to enhance **usability** and overall **user experience**.
- Participated in **feature design and implementation**, improving product functionality and interface consistency.

Projects

Yoga App (Flutter, Dart, AWS, ML Algorithms) github.com/vany2102/yogaApp.git

- Developed an **AI-powered** fitness application using **ML algorithms** for personalized yoga and exercise recommendations.
- Designed application layouts in **Figma** and integrated **ML algorithms** into the platform.
- Built and deployed backend services on **AWS** to improve scalability and performance.
- Collaborated with the team to successfully obtain a design patent **(AppLication No. 202311067307)**

AI Resume Analyzer Job Match System (React.js, FastAPI, LangChain, Generative AI)

- Developed an **AI-powered** resume analysis platform to extract candidate skills and compare resumes against job descriptions.
- Integrated LLM-based analysis to generate **ATS optimization suggestions** and identify skill gaps for targeted job roles.

Achievements

- Completed a 30-day Cloud Engineering, Data Science, and ML program.
- Earned AWS Certified Cloud Practitioner certification in July, 2026.
- Completed the Banking Jumpstart Program, building foundational knowledge of banking IT systems, business processes, and technology-driven operations.
- Successfully completed ITSM and SIAM training sessions, gaining exposure to IT service management, operational workflows, and service integration practices.
